DETAILED ACTION

This office action is in response to an amendment filed 9/29/09. Claims 1, 4, 8, 9, 11, 13-15, 18 and 19 are pending in this application.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tali Cepuritis on January 14, 2010

The application has been amended as follows:

IN THE CLAIMS:

Claim 19 is cancelled.

Claim 1 (currently amended). A pseudotyped SIVsmmPBj 14 vector ~~derived from a SIVsmmPBj 14 virus, which comprises~~ comprising a SIVsmmPBj 14 viral genome in which at least a portion of the SIVsmmPBj 14 *env* gene is deleted to render the envelope protein encoded by the SIVsmmPBj14 *env* gene non-expressible, wherein the vector is capable of transducing cells in a G₀ phase, a mitotic phase, and a G₁ phase; and the vector further comprises a gene encoding an envelope protein of a non-SIVsmmPBj14 virus under the control of a promoter; the non-SIVsmmPBj 14 virus [being] selected from the group consisting of HIV-1, SIVagm, SNV,

MLV and VSV wherein the non-SIVsmmPBj14 envelope protein is expressed to form the vector envelope.

Claim 9 (currently amended). A method for making a pseudotyped SIVsmmPBj 14 vector, comprising the steps of: a) deleting a part of or the entire *env* gene of the SIVsmmPBj14 viral genome or a molecular clone of the viral genome to render the envelope protein encoded by the SIVsmmPBj 14 *env* gene non-expressible; and

b) cotransfecting cells with the construct of a) and an expression construct comprising the coding sequence of a non-SIVsmmPBj 14 envelope protein; wherein the non-SIVsmmPBj 14 envelope protein is an envelope protein of a virus selected from the group consisting of HIV-1, SIVagm, SNV, MLV and VSV wherein the non-SIVsmmPBj14 envelope protein is expressed to form the vector envelope.

In claim 14 delete the word "A" in line 1 prior to "pseudotyped vector" and replace it with the word --The--.

Claim 18 (currently amended). A pseudotyped lentiviral vector comprising the genome of an infectious molecular clone of SIVsmmPBj 14 designated as SIVsmmPBj 1.9 and including an ~~inactive~~ SIVsmmPBj 1.9 *env* gene with a deletion in the SU region that renders the envelope protein encoded by the SIVsmmPBj 1.9 *env* gene non-expressible, and further comprising a VSV-G *env* gene under the control of a promoter, such that the only envelope proteins produced

by the vector are VSV-G envelope proteins, and which is capable of transducing cells in a G₀ phase, a mitotic phase, and a G₁ phase wherein the non-SIVsmmPBj14 envelope protein is expressed to form the vector envelope.

Conclusion

The amendments to claim 1 include removal of language that the vector is derived from SIVsmmPBj14 virus. The use of the term derived is unclear as it is not clear the number of steps and alterations that are allowed in order for the vector to be derived from the virus. This can be any number of steps and alterations. Secondly, the claim has been amended to refer to the SIVsmmPBj14 viral genome using the term "the" which is used to refer to previously recited limitations as opposed to new limitations. In this case, "the SIVsmmPBj14 viral genome" is referring to the SIVsmmPBj14 vector as opposed to a distinct SIV. Thirdly, the claim has been amended to refer to "the SIVsmmPBj14 env gene" as opposed to the non-SIVsmmPBj14 env gene that encodes the non SIVsmmPBj14 envelope protein. Fourth grammatical corrections were intended by insertion of "and" and "further" in line 5. Finally as was inserted into each of claims 1, 9 and 18, the phrase "wherein the non-SIVsmmPBj14 envelope protein is expressed to form the vector capsid" is intended to provide completeness to the claim to specifically clarify the relationship between the recited components and the final vector.

In claim 14, the recited pseudotyped vector is that same made by the method of claim 9 and hence the term "a" was amended to "the".

The limitations of claim 19 were incorporated into claim 18 as claim 18 absent these components was a duplicate of claim 8. As well, claim 18 was amended to delete the phrase "inactive gene" as this implies that the promoter is deleted. However, as set forth in the claim as well as the specification, the protein expression is affect as opposed to disruption of "gene function" due to a deletion. The claim as amended sets forth this relationship more clearly.
